

Fool's Hill Farm

Meadows of Dan, VA

We're excited to share our journey with you as we transform a cow pasture into our dream food-forest/market garden! Fool's Hill Farm is also us, the farmers! As partners, Morgan and Reynaldo, we co-founded our first farm in Tupelo, MS in 2017 where we cut our teeth learning to make a living selling food while learning to responsibly steward land. We strive to grow food by nurturing our soils and ecosystems first, capturing carbon and increasing biodiversity with every crop we grow. We hope you can taste the love we put into our passion of growing food and can join us in building community among our human and non-human neighbors alike! Every journey begins with a first step, and this is ours!
